James P. Barnes

**Peach Special No. 1.** For those wishing a yellow freestone peach with handsome red coloring and shape of Elberta to follow immediately after Golden Jubilee, we offer Special No. 1. The original tree is a seedling standing in sod uncared for, but its production has been such that we have propagated from it, planted in our own orchards and have a few for sale. We have not attempted to introduce the variety nor to give it a name, so when ordering, please specify Peach Special No. 1.
